

EDITORIAL

We are pleased to announce that distribution of Marine Aquarist® now includes: Hong Kong, Taiwan, the Philippines, Puerto Rico, Guatemala and also parts of Europe.

Response to Marine Aquarist® has been exceptionally supportive and positive. Better marine aquarium keepers all over the world are submitting marine life photos along with related aquarium information. The saltwater community has come together to share their experiences and insights so that all those interested in setting up and maintaining successful marine fish and reef displays can benefit from each other.

Marine Aquarist® strives to bridge the scientific community and all levels of marine aquarium keepers. Thus, we always endeavor to incorporate specific details, numbers, and research, in addition to eye-catching and unique photos.

Marine Aquarist® is published quarterly for free distribution through better aquarium stores. It is also provided to aquarium clubs, groups & societies at no cost.

Marine Aquarist® Advisory Board: Dr. Hameed Al-Alawi, Mr. Albert Thiel, Dr. Reginald Lawrence
Executive Editor: Angela Cheng
Image Consultant: Amy Chen
Concept Management: Michael Del Prete

Long Polyp Stony

LPS corals have a skeletal body structure and a soft tissue outer body. They share similar qualities with SPS Corals.
