

EDITORIAL

Marine Aquarist® is growing by leaps and bounds. More retail shops worldwide have a supply for free handout to home aquarium keepers. Hobby clubs across North America are also supplied with a generous number of copies for their members. Online readership is developing worldwide.

With the Spring 2014 issue of Marine Aquarist®, we increase our team and editorial staff with a warm welcome to Amy Chen as our Imaging Consultant.

Albert Thiel, world renowned author and speaker, is an appreciated expert for regularly providing information and photographs regarding nano-reef aquariums.

Our Readers Reef™ section has proven to be one of the most popular features of Marine Aquarist®. In this issue there are even more photos submitted by our readers to show off their fantastic marine displays. One advanced marine aquarium keeper, Shane Canellis from Australia, has shared with us some of his exceptional photos and information. We will again feature his brilliant work in future issues.

We are most fortunate to have Dr. Al-Alawi, the creator of Bahrain Aqualife Centre, provide incredible photos and information for marine life indigenous to the Red Sea. His first article will be printed in our Summer 2014 issue.

As you know, Marine Aquarist® was created for the benefit and enjoyment of our readers. Since this is "our" magazine, please tell us what you want to see. Send your suggestions and ideas to: info@marineaquarist.com. ♦
