

AQUA CRAFT[®], INC.

A world leader in aquatic technology, supplies, and service.

CORAL MARINE™

Scientific Sea Salt Formula™

CORAL MARINE™ is a very good low cost scientifically formulated marine salt that contains all of the elements found in natural seawater. CORAL MARINE™ is buffered to mix to the proper pH of 8.3. CORAL MARINE™ is made from select grade elements without *phosphates* or *nitrates* and includes a dechlorinator.

CORAL MARINE™ is available in 25, 50 and 150* U.S. gallon sizes and can be used in all reef or marine fish aquariums.

BIO-SEA®

Marinemix

BIO-SEA® is a better marine salt that is formulated similar to natural seawater. BIO-SEA® has a stronger pH buffer that will mix to and maintain the proper pH of 8.3. BIO-SEA® is made from select grade elements without *phosphates* or *nitrates* and includes a dechlorinator. BIO-SEA® is available in 10, 25, 50 and 150* U.S. gallon sizes and should be used when a 'true seawater' medium is required and is ideal for use in all reef or marine fish aquariums.

MARINE ENVIRONMENT®

Dual Phase formula™

MARINE ENVIRONMENT® is the best marine salt for long term keeping and reproducing various forms of captive reef and marinelife. MARINE ENVIRONMENT® is a superior two part formula with the strongest buffer for extended pH control, available in 10, 25, 50 and 150* U.S. gallon sizes.

Part #1 is made from select grade elements without *phosphates* or *nitrates* and contains all elements found in natural seawater with enhanced amounts of calcium, sulfate, strontium, and includes a dechlorinator.

Part #2 is a separate "little bottle™" (included in each package). The "little bottle™" contains: water conditioners, stress and shock reducers, a dKH generator, carbonate hardness regulator and select supplemental trace elements that are organically bound in a timed release or on demand medium.

REEF SYSTEM™

The REEF SYSTEM™ is a complete line of saltwater aquarium additives that replace elements used by marine fish and invertebrates during their normal metabolic process and / or elements removed by various forms of bio or chemical filtration.

HYDRO-SAFE™ reduces stress and shock during acclimation, shipping and treating marinelife as it maintains the natural protective slime coat on all marine fish.

TRACE ELEMENTS w/Gel conditioners replaces essential trace ions used by captive marinelife and dramatically improves the working ability of protein skimmers.

GREEN™ is a beneficial algae nutrient that will assist in growing green algae that condition all marine fish and reef aquariums.

BIO-ELEMENTS™ contains: Lithium, Manganese, Iron and Strontium and is ideal for all marine fish and reef aquariums.

CORAL REEF & MARINE FISH VITAMINS™ add naturally occurring substances believed to be essential for marine life which are not found in flake, pellet, frozen or gelatin foods.

AQUA CAL™ is an easy to use calcium additive essential for the growth of marine fish and many corals and invertebrates. It will not alter pH.

REEF IODIDE™ (not iodine) is proven essential for the growth of soft corals.

MACROALGAE IRON ADDITIVE™ is formulated for soft and hard corals, algae, and numerous invertebrates.

STRONTIUM & MOLYBDENUM™ is for the positive interaction with calcium, corals and reef system stability.

INVERT. APPETITE SUPPLEMENT™ stimulates the appetite of many soft and hard corals, various invertebrates, and marine fish. It assists in metabolizing foods that are being offered.

REEF SYSTEM™ supplements are highly suited for use in all reef and marine fish aquariums. Each 8 oz. bottle treats about 1000 U.S. gallons. All REEF SYSTEM™ items have user friendly instructions and list all contents.

VIDEO MARINE FISH IDENTIFIER

identifies over 130 colorful tropical reef fish with both common and scientific names. All fish shown in aquariums. Over 30 minutes. VHS only.

1 DROP™ CU SO₄

Each drop of 1 DROP™ CU SO₄ will add 0.15 ppm (part per million) of copper sulfate to each gallon of water in your quarantine, hospital, treatment or sick tank. 1 DROP™ is easy to use and control.

ECO-SYSTEM™

The ECO-SYSTEM™ is a group of combination additives that will enhance all marine fish and reef aquariums.

MARINE VITA-PEP™ is a combination vitamin and trace element supplement.

MARINE GREEN™ is a combination green algae nutrient and dKH generator and calcium hardness regulator.

MARINE PROLONG™ is a combination pH buffer /trace element replenisher.

SPECIFIC GRAVITY TESTER™

is color coded for easy reading, is accurate, durable, resists air bubbles, and will not come apart.

BUFFER + dKH GENERATOR™

is a fast dissolving powder with a carbonate hardness regulator and calcium that keeps pH at 8.3 in all marine fish and reef aquariums.

BI OX®

BI OX® is recognized as one of the world's most efficient filter mediums and is unsurpassed for use in all trickle filters, canister and custom filter designs. Only BI OX® is a scientifically engineered form that utilizes a "textured deflection plate™" and properly sized drip rods to offer the greatest amount of "usable surface area™".

BI OX® increases essential dissolved oxygen, assists in eliminating undesirable gasses and controlling waste ions.

BI OX® is offered in two sizes (20x25mm & 40x45mm) to meet your individual needs. BI OX® is ideal for use in all freshwater aquariums, marine fish and reef aquariums, and ponds.

*Professional size not intended for consumer use.

All Aqua Craft®, Inc. products are extensively researched, developed, tested and scientifically produced. Aqua Craft®, Inc. products are used world wide in a variety of aquatic applications.
