

# AQUA CRAFT PRODUCTS®

A world leader in aquatic technology, supplies, and service.

## MEERSALTZ®

Public Aquarium Maintenance Formula™

MEERSALTZ® is a high purity blend of ingredients that contains all essential elements found in natural sea water. Ideal for use by public aquariums and large scale marine salt users. Mixes fast and clean without residue into an optically clear stable culture medium.

50, 150 & 8,000 gallon sizes.

## CORAL MARINE®

Scientific Sea Salt Formula™

Coral Marine® is a high purity blend of ingredients that is comparable to European marine salts. Mixes fast and clean without residue into an optically clear stable and consistent culture medium.

50, 150 and 8,000 gallon sizes.

## BIO-SEA® Marinemix

BIO-SEA® Marinemix is the benchmark or world standard for a true sea water substitute. Used by universities, laboratories, State & Govt. agencies world wide. Mixes fast and clean without residue into an optically clear stable, consistent culture medium.

25, 50, 150 and 8,000 gallon sizes.

## MARINE ENVIRONMENT®

dual phase formula™

MARINE ENVIRONMENT® is the very best marine salt available for keeping and reproducing all forms of captive or closed system marine life.

MARINE ENVIRONMENT® is a superior two part formula. The second part "Little Bottle™" which is included in each package contains various supplements that are usually purchased separately. For most marine fish and reef aquarium keepers the use of additional supplements is dramatically reduced or not required anymore.

25, 50, 150 and 8,000 gallon sizes.

## BUFFER+DKH®

BUFFER+dKH® is a blend of the highest purity ingredients that will raise and then stabilize critical carbonate hardness (dKH / KH) & maintain pH at the essential stable level of 8.3 - 8.4.

Available in 200 gram, 400 gram, 3 pound, 12 pound & 45 pound cartons.

## LIQUID ASSETS®

The only essential building block group of supplements without compromise.

Aqua Cal® #1 contains multiple forms of calcium just like in the open sea. Buffer+dKH® #2 is in an easy to use liquid form for controlled applications. Mg #3 is multiple forms of magnesium. SO4 #4 is multiple forms of sulfate. K #5 contains multiple forms of essential potassium just like in the open sea. BIO-Elements™ #6 essential elements. Bromide #7 contains essential levels of Bromide for the uptake of iodide. Iodide #8 is for coral color, development and growth of soft, LPL & SPS. Sr & Mo #9 Strontium & Molybdate. Sea Trace #10 is an All-In-One trace element restorer for your aquarium. Sea Safe #11 used when mixing new marine salts & with water changes. Marine Prolong #12 solution replenishes pH and restores trace elements.

All LIQUID ASSETS® are made with the highest quality and purity ingredients.

Just like in the open sea and on the worlds reefs, each contains multiple forms of each essential ion. This allows each captive marine organism to metabolize.

Available in 16 oz. sizes to treat 2,500 US gallons & 1 gallon sizes to treat 20,000 US gallons.

## Refractometer Calibration Solution™

Proper calibration of refractometers is essential to measure the honest salinity or specific gravity of your salt water. Long lasting 2 oz. bottle with dropper top.

## 1 DROP™ CU SO<sup>4</sup>

Each drop of 1 DROP™ CU SO<sup>4</sup> will add 0.15 ppm. (part per million) of copper sulfate to each gallon of water in your quarantine, hospital, treatment or sick tank. Designed for ease & control.

1 oz. bottle with dropper top.

## DIY 2 part + Mg

Low cost. High purity. DIY essentials.

400g calcium #1, 400g Alk. #2 & 200g Mg #3 sizes will make: 1 gallon each of high purity concentrate of Ca & Alk. and 32 oz of Mg. This is the perfect ratio for low cost, DIY supplementation. Includes complete instructions and also a measuring cup if required. 2, 7 1/2, & 30 pound sizes.

## MARINE ENVIRONMENT®

Supplements™

Improves the composition and working ability of 1-step marine salts. Rate of improvement depends on initial quality of the 1-step salt being upgraded. Contains: ACP™ BIO-Elements™, Iodide, Sea Trace® & Sea Safe®. Not found in any 1-step marine salt.

Available in 16 oz. size to treat 2,000 US gallons and 1 gallon size to treat 16,000 US gallons.

## REFRACTOMETER

Checking and adjusting critical specific gravity or salinity is the fundamental, easiest and most essential part of all marine fish and reef aquariums.

Using a refractometer is the best way to test for and measure your water's honest salinity or specific gravity.

ACP #101 Portable Refractometer™ is a complete kit that includes a hardcover carry case, complete instructions, cleaning cloth, calibration key and easy to use high standard refractometer.
